

SAFETY PRECAUTIONS 2020/2021

Temperature Checks

Every student and teacher will have their temperature checked daily upon arrival. Those with a temperature of 100.4 or higher will immediately be sent home. If diagnosed with COVID-19, or in contact with someone who has contracted the illness, the student or teacher may not return for 14 days.

Hand Washing/Sanitization

Every student and teacher will use hand sanitizer upon arrival and before departure. All students and teachers will also be required to wash their hands before snack & lunchtime.

Increased Disinfecting Measures

All toys will be disinfected daily, prior to arrival. All high touch surfaces will be sanitized daily, including restrooms, tables and check-in stations.

Naptime

Students will nap 6 feet apart, in a toe-to-toe arrangement. Nap mats and bedding will be stored in individual airtight containers to help prevent the spread of germs. Parents of babies will be required to provide their own pack & play for nap, to ensure that classroom pack & plays are never shared between students.

Split Lunchtime

To allow for increased social distancing, lunchtime will be split into two shifts with only half of the students using the lunchroom at a time, with disinfecting measures in between.

Increased Distance in the Classroom

Space between students will be increased during table time, circle time, and group activities. Games with physical contact will be avoided. Group electives such as chapel will have increased distance between seats.
