

Field visit to one of the Bomas that has received a goat. (Lendikinya)

On these visits, we meet the families that received the animal, see the conditions in which they live, verify the overall health of the animals, and sometimes sneak a moment to hold a baby goat.

15 mins away, another Boma visit. This Boma has received a Donkey + water tank. As with goats, we meet the recipients and see the conditions.

Walking up to the church in Lendikinya, Patrick pointed out traditional beehives up in the trees.

The Church in Lendikinya

To the left of the current church, a foundation for a new Sanctuary.

This humble, rustic church has the warmest congregation. And their choir sounds like angels singing. After meeting this congregation last year, it felt like returning home.

New
Church

In Lendikinya alone,
128 goats have been
gifted, 5 donkeys +
water tanks, and
100+ chickens.

Recipients are
determined by a
church committee
that is able to
assess greatest
need.

this is a communal watering hole on the way to Moita. These areas shrink throughout the dry season. Both humans + livestock use this.

The first Boma in Moita that we visited

Another Moita Boma where a woman has received a goat.

livestock, crops, and people all use this tank water.

At this Boma we learned that donkeys also carry maize to a community grinder!

Moita Church: Another church we visited last year also. Lots of progress has been made on their building. We did a goat distribution here also.
